Dr. Frank Harrison
President
University of Texas at Arlington
Arlington, Texas 76010

Dear Dr. Harrison:

The decision of the State Board of Mental Health and Mental Retardation to locate the new North Texas School in Fort Worth must be credited to the efforts of many groups and individuals working together for our city.

Your help and support of the proposal made by the Fort Worth Chamber of Commerce greatly contributed to our success. Our proposal would not have been accepted except for all of us working together in a unified effort for the city.

State funding for the school is expected to be forthcoming from the next special session of the Legislature and construction should begin shortly thereafter. It is most important that Fort Worth continue its willingness to work with the State Board and Staff in creating the best school possible for Texas. I am certain that we can anticipate your continued support.

Very truly yours,

Harry K. Werst
