## PILOT CLUB OF DALLAS

The Pilot Institute was founded in June, 1943, by the Pilot Club of Dallas, a small group of business women organized to render service. Within a six-year period this school has grown from a one-teacher class in borrowed quarters into an internationally recognized institution with a complete program of oral instruction. The school now has a staff of twelve, and 52 children are enrolled.

The North Dallas-Park Cities Kiwanis Club, through its Trust Fund, pays for the building repairs as they are needed, improvements to the grounds, and the caretaker's salary. In fact, the establishment, maintenance and operation of the Pilot Institute has aroused the civic interest of individuals and other Dallas organizations in the work until now it has taken on many of the aspects of a community project. The Pilot Institute for the Deaf is destined to fulfill an important role in the education of deafened children.

The school is located at 4909 Cedar Springs Road, and the telephone number is Justin 8-4274.

### DAILY SCHOOL ONLY

Hours: 9:00 a.m. to 3:00 p.m.

*Otologist*  
Dr. Roy E. Mathews  
*Pedodontist*  
Dr. Paul Richter  
*Ophthalmologist*

# Can *You* turn a deaf ear to these Children's Needs?

### AN OLDER CLASS IN RHYTHM

Through vibration the deaf child is able to improve his accent, fluency and phrasing.

### BOYS' TUMBLING GROUP

Acrobatic dancing for muscular coordination and body development.

### PHYSICAL INSPECTION

A well child is a happy child.

### THE STORY HOUR

From lip reading the children are enjoying the story of the Three Bears.

## No child is turned away Early training is essential

It has been proven that a small deaf child, who has never heard the sound of a human voice, can be taught to speak intelligibly and to read lips. Educators agree that early training is essential. It is the aim of the

Pilot Institute for the Deaf to provide oral education, to the end that he may lead a useful, happy life among normal speaking and hearing people.

The Dallas Pilot Institute for the Deaf has no affiliation with any state or municipal educational system.

It is financed entirely by voluntary contributions, except for a nominal tuition. No child is turned away for lack of funds; rather the ability of the child to learn and the willingness of the parents to cooperate are the principal things considered.

## Work of PILOT INSTITUTE is part of pattern shaping in the educational and medical progress of Dallas... it merits support

### A CLINICAL TEST

Testing a three year old to determine the amount of residual hearing.

### AN INDIVIDUAL SPEECH LESSON

The child is aided by feeling vibration in the teacher's face as well as seeing the lip position in the mirror.

### AN AUDIOMETRIC TEST

With the aid of the audiometer an accurate test of the child's hearing loss is recorded.

### AN ACOUSTIC PERIOD

A group of pre-school children enjoying nursery records with amplification.
