March, 1958

This is Mary Lynne Dunning, 1958 National Easter Seal Child, and she is happy in her new-found freedom to walk again.

The Month of March through Easter Sunday is Easter Seal month, when the public's purchase of Easter Seals and other contributions to the National Society for Crippled Children and Adults provide the funds for medical care, treatments, equipment, educational opportunities, and ultimate rehabilitation for those who so sorely need such attention, especially children.
